DETAILED ACTION

1. This Office action is responsive to the amendment filed 10 March 2006.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claim 3 is rejected under 35 U.S.C. 102(b) as being anticipated by Chu, U.S. Patent No. 5,920,899.

As per claim 3, Chu discloses a data processing system for processing data via a plurality of processing blocks, comprising:

a plurality of block control circuits provided corresponding to said respective processing blocks (figs. 1, 7 & 15, stage controllers corresponding to data registers and function circuits),

said block control circuits controlling corresponding processing blocks by a clock synchronization respectively and transferring a handshaking control signal with other block control circuits, thereby controlling a data transfer between said processing blocks by self-synchronization type handshaking (figs. 1, 7 & 15, stage controllers exchange request and acknowledge signals to control latching at each stage),

wherein said data processing system further includes an arbitration circuit for interfacing with an external system (fig. 17, comprising elements 74-78),

Art Unit: 2115

said arbitration circuit transferring a system control signal synchronous with a clock with said external system, thereby creating said handshaking control signal based on said system control signal (figs. 18 & 19, col. 10, lines 19-59).

Allowable Subject Matter

4. Claims 2-6 and 7-10 are allowed.
